

Complete Cart Management

Our complete cart and course management system is more efficient, reduces costs and gives your golf operations team control of your fleet of vehicles at all times.

Pace of Play Management

- Real-time cart tracking from clubhouse and ranger cart
- Pace-of-Play monitoring from clubhouse and ranger cart
- Colour-coded icons highlight carts that are ahead of time (green), on time (yellow) and behind time (red)
- Complete cart history and reporting

Course Map Management

- Draw and customize action/safety zones to trigger warning alerts to drivers and/or to 'kill' the forward movement of the vehicle
- Create unique action/safety zones to display custom on-screen messages when vehicles reach specific locations

Cart Guidance System

- Cart Path Only mode alerts drivers when cart leaves the path
- Clubhouse alerted when carts fall too far behind pace-of-play or enter no-cart zones

Two-way Communication

- Golf Operations team can send messages to specific carts from the base station
- Cart drivers can request help from a Ranger/Marshall

Benefits and Features for the Golf Operations Team

- Improves pace-of-play
- Improves player experience - both members and visitors
- Increases revenue:
 - Increase cart revenue - a cart with GPS can command a higher rental fee
 - Increase cart revenue through more frequent hire rates
